## Subject Index

---

- activation function, 73
- algebraic polynomials, 9
- alternating algorithm, 109
  
- Banach–Alaoglu Theorem, 101
- Biermann’s Theorem, 42
- brick, 160
  
- Cauchy functional equation, 13, 17
- central proximity map, 136
- closed path, 99, 157
- closure, 77
- cross-section, 89
  
- difference commensurable points, 163
- Diliberto–Straus algorithm, 101, 135
- direction, 8
  
- elementary brick, 164
- existence set, 90
- extremal path, 99
  
- Gegenbauer polynomial, 142
- generalized ridge function, 1
- geometric characterization condition, 42
- geometric convergence, 119
- greedy-type algorithm, 123
  
- Hardy’s inequality, 126
- Hermite–Genocchi formula, 2
- Hessian, 35
- Hilbert Basis Theorem, 46
- homogeneous polynomials, 9
  
- integral representation, 141
- interior wedge condition, 80
- inverse problem, 28
- irreducible path, 88
  
- length of a path, 88
- Lipschitz graph domain, 78
  
- MNI-property, 153, 170
- mollifiers, 75
- multilayer feedforward perceptron (MLP), 4, 73
  
- natural lattice, 43
- NI-property, 153, 169
- normal, 78
  
- Parseval identity, 146, 150
- path, 88
- plane wave, 2
- Pochhammer symbol, 143
- polynomial ideal, 46
- projection pursuit, 3, 123
- proximal set, 90
  
- regular hexagon, 167
- relaxation parameters, 107
- remotest set algorithm, 123
- reproducing kernel, 144
- ridge function, 1, 2
- ridge monomial, 36
- ridge polynomial, 36
- ridgelets, 4, 73, 147
  
- Schwartz space, 148
- Serret’s Theorem, 38
- signed brick, 161
- signed regular hexagon, 167
- smooth, 130
- spherical harmonics, 144
- strongly non-expansive, 111
- Sylvester’s Theorem, 46
- symmetric tensor decomposition, 56
  
- ultraspherical polynomial, 142
- uniformly convex, 91, 130
- uniformly smooth, 130
  
- Waring’s Problem, 5, 48
- weak greedy algorithm, 124
- wedge, 80
