522.5	522	Atp5j.5-m	ATP synthase, H+ transporting, mitochondrial F0 complex, subunit F6	Transcript Variant: This variant (5) differs in the 5' UTR and the 5' coding region, compared to variant 1. The predicted isoform (b) is longer, and it contains a distinct N-terminus, compared to isoform a. The existence of a translated product from this transcript needs to be experimentally confirmed.
