

## **Plasmodium falciparum clone 3D7 Chromosome 1**

Telomeric regions	RNAs
	tRNA
	rRNA
	Pseudogene

## FUNCTION

A vertical legend on the right side of the figure, consisting of colored squares next to their corresponding function names:

- enzyme (orange)
- enzyme regulator (yellow)
- defense/immunity protein (dark red)
- structural molecule (light blue)
- chaperone (green)
- transporter (pink)
- cell adhesion molecule (red)
- ligand binding or carrier (light blue)
- transcription regulator (dark blue)
- translation regulator (purple)
- other function (dark green)
- molecular function unknown (light yellow)
- no assignment (black)
