

Prostate MRI Procedure Survey

1. Do you perform prostate MRI at your institution?

- Yes
- No

2. Name of institution (to evaluate for duplicate answers from institutions)

3. How do you describe your institution?

- Academic
- Large private practice
- Community group

4. How many prostate MRI studies do you perform per month?

- <1
- 1-5
- 6-10
- 11-20
- 21-40
- 41-100
- > 100

5. How long have you performed prostate MRI?

- < 5 years
- 6-10 yrs
- 11-15 yrs
- 15 + years

6. What field strength do you most commonly perform prostate MRI?

- < 1.0 T
- 1.0 T
- 1.5 T
- 3.0 T
- > 3.0 T

Prostate MRI Procedure Survey

7. Do you usually perform prostate MRI with an endorectal coil?

- Yes
- No

8. Which sequences do you typically perform?

- T1 axial
- T1 sagittal
- T1 coronal
- T2 axial
- T2 sagittal
- T2 coronal
- Diffusion weighted imaging
- Diffusion tensor imaging
- Dynamic contrast enhancement
- Magnetic resonance spectroscopy

Other (please specify)

9. How many radiologists will read prostate MRI at your institution?

Approximate Number:

10. How many total radiologists read body MRI are at your institution?

Approximate Number:

11. Do you have the ability to biopsy prostate lesions by MRI guidance or by MRI-Ultrasound fusion?

- Yes - MRI Guidance
- Yes - MRI/US Fusion
- Yes - Both
- No

12. Do you use sedation for prostate MRI examinations?

- Yes
- No

Prostate MRI Procedure Survey

13. Common indications for prostate MRI referrals at your institution?

- Prostate Cancer Staging
- Elevated PSA with prior negative biopsy
- Active Surveillance monitoring
- Surgical Planning
- Radiation Therapy Planning
- Prostate Cancer recurrence after therapy

Other (please specify)
