

Supplementary Figure. Per-pathogen clinical cure of baseline ESBL-producing Enterobacteriaceae at test-of-cure in evaluable patients with a (susceptible or resistant) pathogen at baseline. Most of the CTX-M-14/15 ESBL-producing isolates produced multiple enzymes and also expressed 1 or more of the following: OXA-1/30, TEM-1, SHV-1, SHV-11, SHV-32. Abbreviation: ESBL, extended-spectrum β -lactamase.
