

Supplementary Online Content

Driver BE, Semler MW, Self WH, et al; for the BOUGIE Investigators and the Pragmatic Critical Care Research Group. Effect of use of a bougie vs endotracheal tube with stylet on successful intubation on the first attempt among critically ill patients undergoing tracheal intubation: a randomized clinical trial. *JAMA*. doi:10.1001/jama.2021.22002

Data Sharing Statement

Data

Data available: Yes

Data types: Deidentified participant data

How to access data: These data can be accessed by emailing jonathan.d.casey@vumc.org.

When available: beginning date: 10-01-2022, end date: 10-01-2025

Supporting Documents

Document types: None

Additional Information

Who can access the data: Researchers whose proposed use of the data has been approved.

Types of analyses: The data will be shared with researchers testing a hypothesis outlined in an institutional review board approved protocol.

Mechanisms of data availability: The data are made available without investigator support, after approval of a proposal, and with a signed data access agreement.

Any additional restrictions: None
