

Supplementary Figure 5

Supplementary Figure 5. Reversal of established AA with topical Tofacitinib treatment. C3H/HeJ mice with AA were topically treated with 2% (w/w) Tofacitinib (n=3) or vehicle control (n=3) twice daily for 12 wks. **(A)** Representative images of Tofacitinib or control treated C3H/HeJ mice before or after 12 weeks treatment. **(B)** Percentage of skin hair loss or regrowth is shown before and after treatment. ns indicates not significant, **P < 0.01 (Unpaired Student t test).
