

40 schools recruited to the study

All students in Year 7 sent parental opt-out information sheets

Baseline survey data collected from students and teachers

Randomisation of 40 schools to either intervention or control arm

Intervention

Needs assessment from baseline survey fed back to schools at beginning of intervention year 1

Facilitated intervention delivered for two consecutive school years

Control

Normal practice continues.

24 month survey conducted at end of intervention year 2

Intervention

Needs assessment from 24m survey fed back to schools at beginning of intervention year 3

Schools deliver unfacilitated intervention for 1 school year

Control

Normal practice continues.

36 month survey conducted at end of intervention year 3
